ASSIGNMENT 2

Your E-commerce Site: Static, Responsive Pages

Full Name: M. Hashim

Roll Number: FA24-BCS-119

Project: Etsy-inspired e-commerce homepage and product detail page

Completion Report

This document contains the assignment statement, screenshots of the website running in a browser, and the available HTML source code. The supplied screenshots show the homepage sections and the product detail page.

Assignment Statement

Assignment 2 — Your E-commerce Site: Static, Responsive Pages

Difficulty: Easy–Medium · Covers: Lectures 5–10 (CSS Fundamentals through Responsive Design and Frameworks) · Folder: assignment-2/

Task: Build the static, responsive front page and product page of your e-commerce site, modeled on your chosen reference site. No JavaScript yet — this assignment is entirely about layout, styling, and responsiveness.

You must build:

• A homepage / product listing page with a header (site name/logo, a nav bar, a cart icon that does not need to work yet) and a responsive grid of at least 8 product cards (image, name, price, an “Add to Cart” button that does not need to work yet).

• A single product detail page for one product: larger image, name, price, description, quantity selector, and an “Add to Cart” button (again, not functional yet).

• A consistent footer across both pages.

• The whole layout built with Flexbox and/or CSS Grid — no table-based layout, no absolute-positioning-everything.

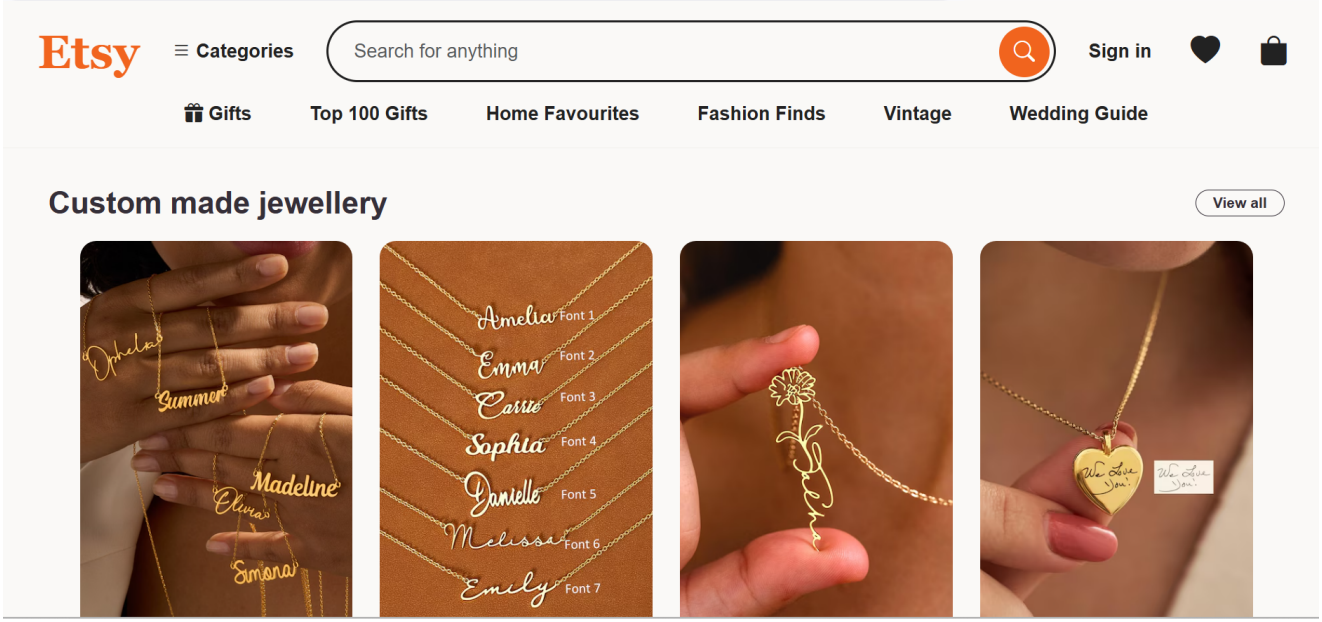

• Genuine responsiveness: the layout must reflow sensibly at a phone width (~375px), a tablet width (~768px), and a desktop width, using media queries or your framework’s responsive grid classes. Screenshot all three widths for your completion PDF.

• Either Bootstrap or Tailwind (your choice) used for at least the grid/layout and the navbar — this is the frameworks half of Lecture 10, and it should actually be doing real work in your layout, not just be linked and unused.

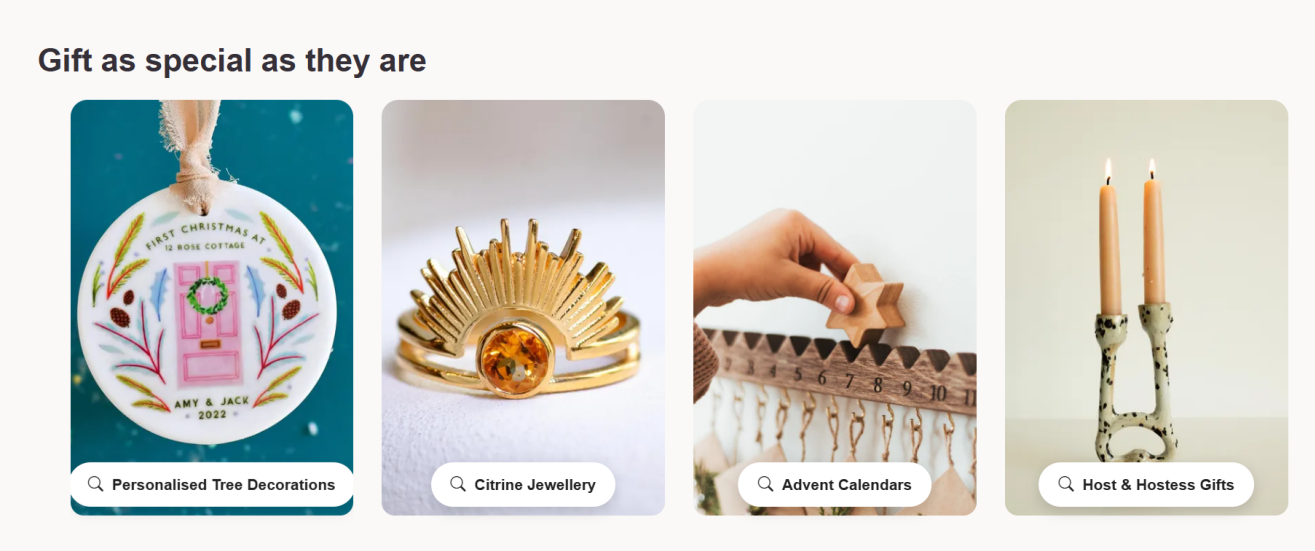

Deliverables in assignment-2/: index.html, product.html, your CSS (or framework config), a README.md with your reference site’s name/URL/screenshot (see above), and your completion PDF.

Screenshots of Finished Work

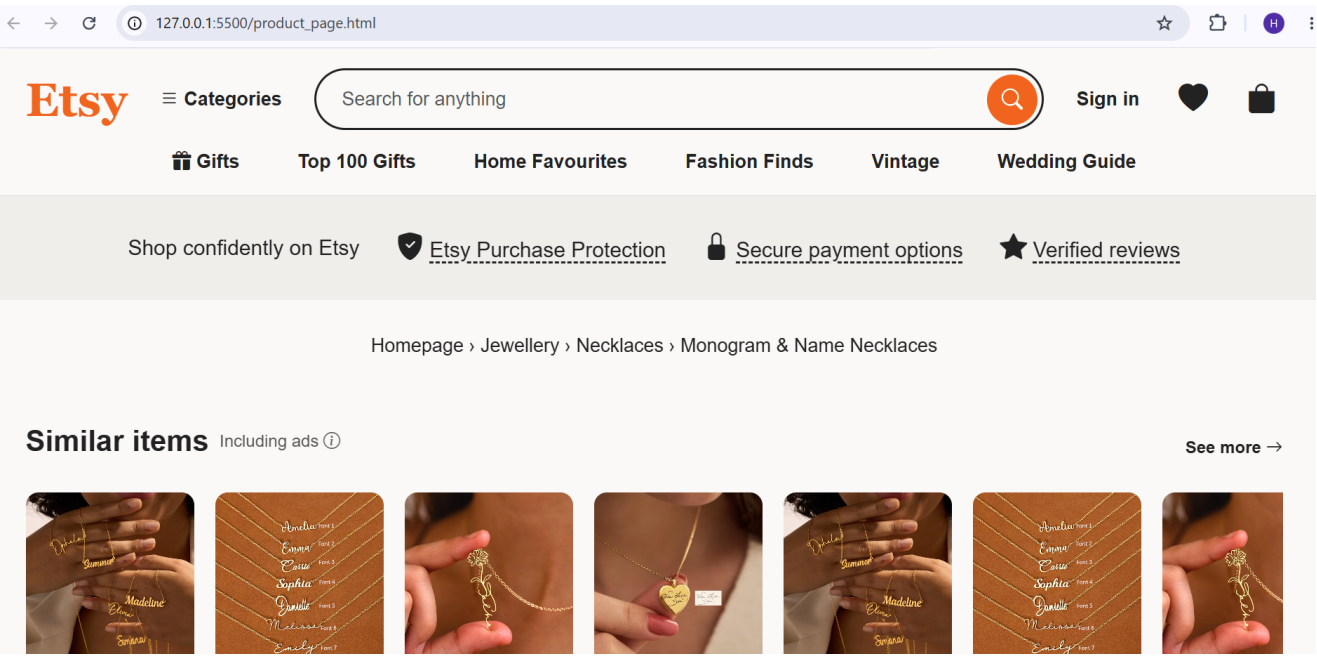

The following screenshots were provided as browser output for the Etsy-inspired site. They document the desktop appearance; separate phone-width (~375px) and tablet-width (~768px) screenshots were not included in the supplied images.

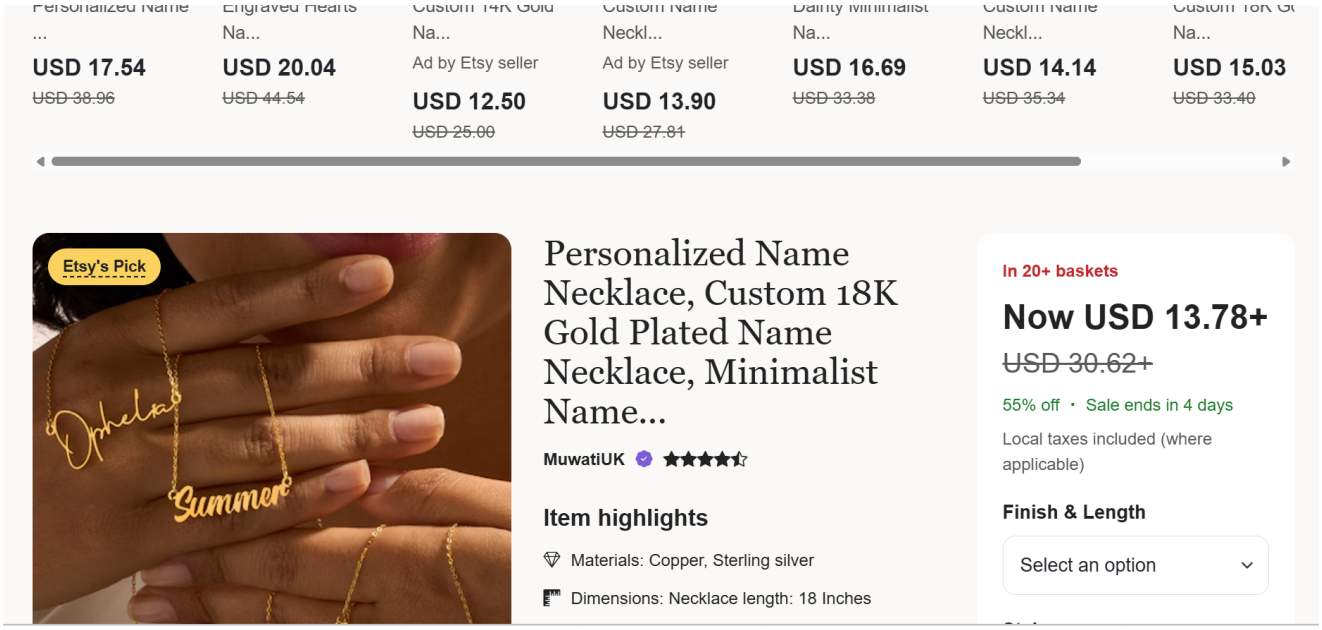

Homepage — Custom made jewellery product cards

Homepage — Gift categories section

Product page — Header and similar items section

Product page — Main product details and purchase options

Source Code — Homepage (index.html)

The HTML below is transcribed from the provided homepage source file. The page links to `style.css`.

Stylesheet Source Note

The supplied HTML files reference two external stylesheets: `style.css` for the homepage and `page.css` for the product page. Those stylesheet contents were not present among the source files available when this PDF was assembled, so they are not reproduced here. Add the exact CSS files to the assignment folder and include their source text in the PDF if your instructor requires every code file to appear in the completion document.

Responsive Screenshot Note

The assignment asks for screenshots at phone (~375px), tablet (~768px), and desktop widths. Only the supplied desktop browser screenshots are included in this version. Capture the phone and tablet views and add them if you want the PDF to document all three required widths.
